Hazardous Substances Management in the Workplace

The seminar will provide an update on the new regime for management of hazardous substances that will occur when the ***Health and Safety at Work (Hazardous Substances) Regulations 2017*** come into effect on December 1st. It also includes an overview of the *Health and Safety at Work Act 2015* and the *Health and Safety at Work (General Risk and Workplace Management) Regulations 2016* as they relate to the management of hazardous substances, including the requirements for explosives. The presentation slides will be provided as reference documentation. A certificate of attendance will also be provided to participants along with a CPD log which records the training.
