IoQ QUARTERLY NEWSLETTER

Issue No. 36
October 2013

Executive Committee 2013/14:

President:

Mr Gordon Laing

Vice President:

Mr Les Ward

Immediate Past President:

Mr Gavin Hartley

Board Members:

Mr Murray Discombe

Mr Andrew Mahan

Mr Peter Morgan

Mr Chris Sinclair

Mr Tony Carpenter

Mr Dean Torstonson

National Secretary/Treasurer:

Mrs Christine Dodds

President's Note

A warm welcome to the spring 2013 newsletter. This is my first newsletter as IOQ NZ president and I look forward to representing your interests over my term of office.

We had a very successful 45th Annual Conference held in Dunedin this year. Martin Hammond (Conference Chairman), the Local Conference Committee and Adrian Mattinson managed to organise not only a great conference, but also the weather to match. At this conference New Zealand also hosted the 2013 IOQ International Presidents' Meeting which was attended by;

Colin Jenkins – President (United Kingdom)

Wayne Scott – President (Australia)

Glen Johnson – President (South Africa)

David Hogan – Chairman (Hong Kong)

Lee Kam Fatt – President (Malaysia)

Phil James – Executive Director IoQ (United Kingdom)

Chen Nyet Lin – Honourable Secretary (Malaysia)

Dru Oxley – Young Members (Australia).

Phil James from the UK delivered the opening keynote address to the delegates at this year's conference which was well received. Of particular interest at the conference this year was the panel discussion on the changes to legislation that will have an impact on the quarry industry (see more below).

This year's IOQ NZ's AGM saw some changes to the executive, with Gavin Hartley now the Past President & Les Ward the Vice President.

The latest member to join the executive is Dean Torstonson, who works for Rorisons RMD, based in the Bay of Plenty. Also, many

thanks to our outgoing Past President, Warwick Leach, for all the work he has done for the executive over the past 11 years.

Congratulations to this year's IOQ NZ award winners (see list below) and all the other nominees for the effort that was put into your entries - now is the time to check out the criteria and start thinking about eligible entries for next years' awards. As the International Presidents' meeting for 2014 is being held in April, the

executive will also be looking for any nominations for the Caernarfon Award by February 2014. IOQ NZ is looking to retain

Top Row from left - Wayne Scott, Australia, David Hogan, Hong Kong, Colin Jenkins, United Kingdom, Gordon Laing, NZ.

Bottom Row from left - Gavin Hartley, NZ, Dru Oxley, Australia, Glen Johnson, South Africa and Phil James, United Kingdom.

the Caernarfon Award, which its members have now won for the past three years.

Caernarfon Award: This award is presented annually for the best paper given at an Institute conference, seminar, meeting etc. anywhere in the world, which is adjudged to have contributed the most to the advancement of some aspect of the industry – either technical, environmental, strategic etc.

Another important event for the quarry industry was the recent release of the Discussion Document on "Safe Mines: safe workers". Our industry came together to provide the majority of the submissions received by the Pike River Implementation Team (PRIT) and this was followed by an opportunity to send in a submission to the Government's Transport & Industrial Relations Select Committee which I also presented to in person at Parliament House in early August.

The time and effort put in by everyone into these submissions has resulted in the Quarry Industry's collective voice being heard with the result that the quarry industry will now work in conjunction with MBIE to develop a set of Quarry Regulations (see part 9, Quarries of the Health & Safety in Employment (Mining Operations) Regulations 2013). My sincere thanks to all those who have made this possible for our industry.

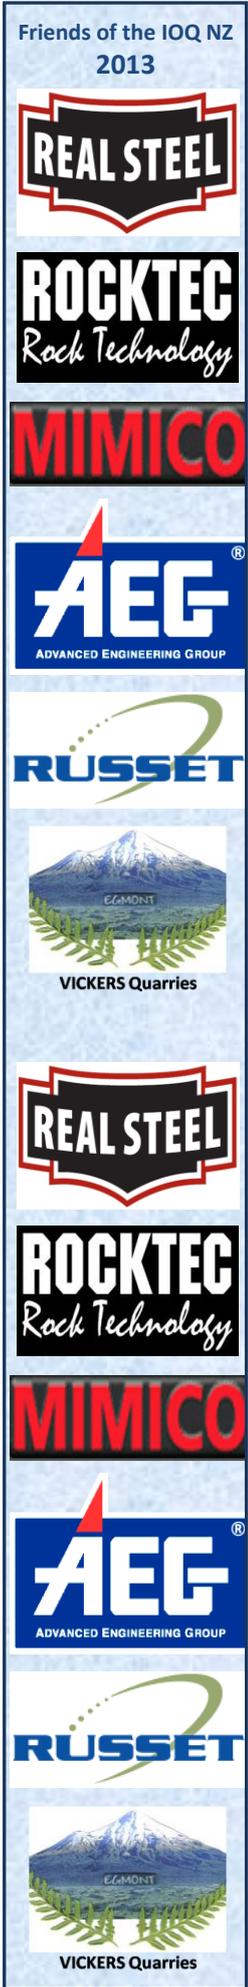

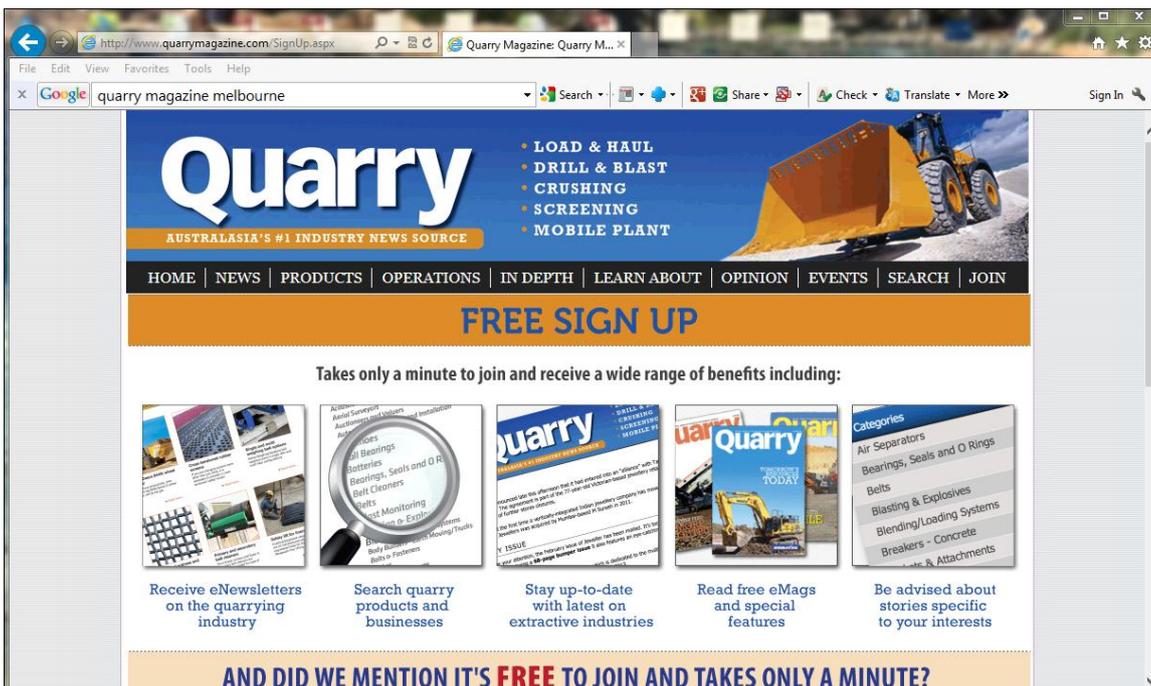

The training organisation, MITO, has now elected an Extractive Industry Governance Group for the TRoQ for the industry and I am pleased to announce that Chris Sinclair has been nominated to represent the IOQ NZ on this Group.

I can now confirm that the IOQ NZ's Continuing Professional Development on-line programme has now gone live, having been launched at this year's AGM. All current members can access this through the members' log-in section of the IOQ NZ website.

Kind Regards,
Gordon Laing
IOQ President 2013 - 2015

QUARRY MAGAZINE <http://www.quarrymagazine.com/SignUp.aspx>

Quarry is a business-to-business magazine and a valuable reference tool for quarry operators, recyclers and members of the quarrying and mining industry. The website has current news topics and you can sign up for the newsletter for free or subscribe to the official magazine through the website - <http://www.quarrymagazine.com/Quarry.aspx> or

IOQ AWARD WINNERS 2013: At the recent QuarryNZ Conference the winners of this year's awards were announced:

NIEMAC AWARD

Graham Fergusson presents **Craig Payne** from J Swap Quarries with the 2013 Niemac Trophy - a working scale model of a jaw crusher.

Thank you to Niemac & Rocktec for the Supplier Awards!

ROCKTEC INNOVATION AWARD

George Kelcher is presented the award by Jason Tapper of Rocktec [now part of the Southern Cross Engineering Group]. Road Metals manufactured a machine to remove coal from gravel with the resulting product being used in 'breeze blocks' at an Alexandra plant - an outstanding example of innovation which impressed the judging team.

WINSTONE AGGREGATE SAFETY AWARD

Kerry Reilly from Baldwins Quarry, Meremere is presented the award by Winstone Aggregates General Manager, David Cilento. Kerry Reilly has worked in quarries for many years and his operation at Meremere has been accident and incident free for more than six years. Kerry is justifiably proud of his safety record.

R D HASSED MEMORIAL TROPHY

Andrew Dronjak is all smiles as he holds the trophy. Andrew has assisted for many years to organise the Annual Health & Safety Review meetings and as Auckland Branch Secretary Treasurer and Chairman for many years was often there to greet members as they arrived at meetings. Andrew was also the first student representative on the IOQ Executive Board.

IOQNZ SHIELD

Warwick Leach is a worthy recipient of the Institute of Quarrying Shield having worked for 14 years on the IOQNZ Executive Council, represented the IOQ on the EXITO and MinEx Safety Council Boards and as Vice President, President and Immediate Past President of the IOQ from 2008-2013.

LYN JORDAN MEMORIAL TROPHY

Daniel Leemeyer, Jason Tavioni & Nick Bastow engineers from RedBull Powder Co. were the recipients of this year's award. Their paper entitled 'Construction Blasting - the Waterview Connection Project' was presented at an Auckland Branch meeting in May and explained the magnitude of one of NZ's largest roading construction projects and the many complicated blast designs required to ensure that all contractors working at the site, together with neighbours were continually safe.

Waikato/Bay of Plenty Branch Report

[by Michael Goodall]

13th August: Our first meeting for 2013/14 was held at C&R Developments in Cambridge. The night was a huge success, with over 140 people attending. This made it the largest event of any IoQ meeting, ever. Michael and Tim opened up there facility to us, they put on a great evening and it was good to see their Caterpillar D11T on show.

Tim and Mike also gave a very interesting talk on projects they have completed in New Zealand and Overseas, and had some great film footage. This was enjoyed by all members, young and old. The brothers, Tim,

Tony and Mike also put on a great BBQ and had plenty of drinks on hand. Goughs supplied the BBQ trailer and did the cooking.

We would like to thank the brothers again for such a great evening!

October 22nd: Our next meeting will be held at the Perry's Galvanizing Plant in Hamilton, this is something very different and pretty impressive. We are hoping for a very good turnout, once again. Perry's will also be putting on the BBQ and beverages, so please show your continued support.

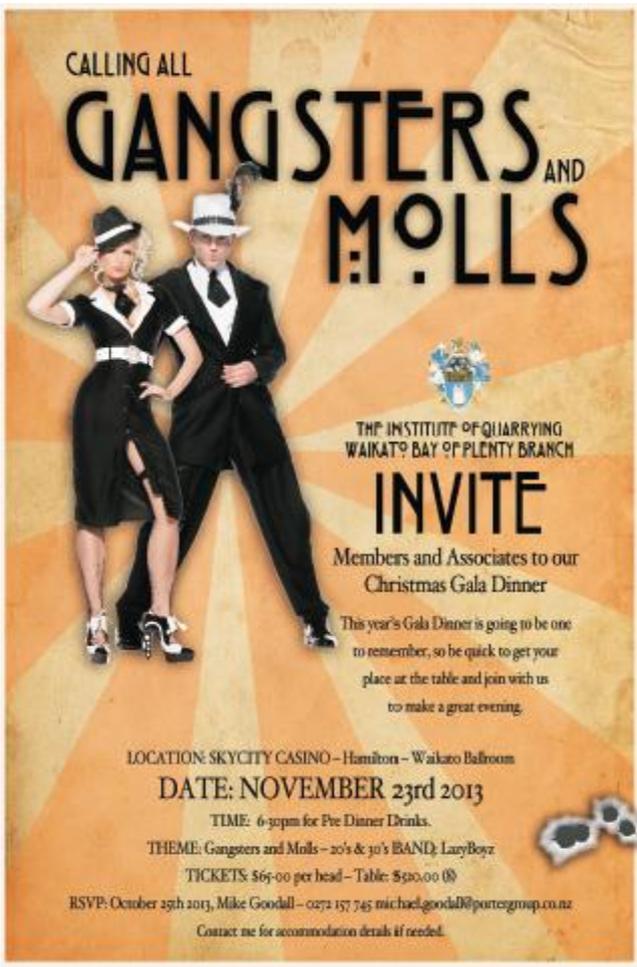

Field Trips - We are still working on number of field trips, including, site visit to the Fletchers new mega tunnel boring machine (TBM) in Auckland, NZ Steels Taharoa Iron sands facility, plus a number of other options. We will update shortly.

Christmas Gala Dinner

You should have all seen the flyers regarding this year's event at SkyCity Hamilton on the 23rd of November; there is 20's 30's, gangsters and moles, and we have a really good band booked, will be a smoking night..... There has been tremendous interest in this year's Gala, make sure you get a ticket(s), please let us know as soon as you can if you want tickets.

MIMICO is at your service

[Article submitted by Dwayne Barlow]

MIMICO is the exclusive New Zealand distributor for Metso plant, parts and service. Metso, of course, leads the world in designing and manufacturing rock crushing and screening plants - both mobile and static.

Mobile crushing and screening plants provide new cost-effective options for aggregate production in New Zealand quarries, and on construction and recycling sites. Modern static crushers, screens and accessories can increase production and improve efficiency.

Not only can MIMICO supply you with superior Metso equipment, they can also provide you with OEM parts and expert service on all Metso equipment. But that's not all they do.

At MIMICO, they don't just service everything they sell. They are ready, willing and able to service all makes of crushers and screens, up and down the country, any time you need. This means that no matter what equipment you are using, you can call the MIMICO service team and they will help you ensure your operation minimises downtime and keeps up and running for longer.

Dedicated service is available from three MIMICO branches (Auckland, Matamata and Christchurch) and 15 Service Agents throughout New Zealand. No matter where your contracting or quarry business is located, MIMICO has the resources to provide you with repairs and maintenance.

The MIMICO service team is capable of handling all servicing and any unplanned breakdowns anywhere in New Zealand. Mobile service teams carry out scheduled servicing and respond to heavy machinery breakdowns all over New Zealand.

Contact MIMICO now to find out how they can help your operation.

Employment opportunity - Crushing & Screening Sales Representative

Purpose of Position:

Sell Metso Crushing and Screening related Capital Equipment across New Zealand and the Pacific Islands.

The appointee will report to the General Manager with full accountability for Crushing and Screening equipment sales, profit and market share targets. The ability to develop and implement innovative strategies to further lift market share, profile and penetration, whilst ensuring existing clients' service and satisfaction levels are maintained is essential. The role requires strengths in negotiation, the ability to develop partnership relations, and the vision and strategic thinking abilities to turn opportunities into tangible and profitable results for the company. This is a hands-on role dictating the need for commercial acumen and the ability to communicate effectively at all levels.

The appointee must have a demonstrated track record of success in long term strategic selling and marketing, ideally from within the heavy industrial, construction equipment or capital asset industry sectors.

Key Accountabilities:

- Sales** - Conduct client visits with sales team to strengthen relationships and build networks for referral business
- Driven to build customer trust and loyalty through a focus on delivering to the customer's needs
 - Use existing networks and build key industry networks
 - Develop Marketing programs (in conjunction with Marketing) pitched at winning new business and growing existing business to increase brand awareness
 - Grow product market share in the aggregate industry
 - Attend Institute of Quarrying/Aggregate and Quarry Association conferences and local area meetings
 - Attend ongoing training relevant to role where applicable
 - Target sales of \$4.5m NZD pa
 - Sell both static and mobile equipment

Strategic Role - Identify opportunities to grow MIMICO's market share and increase revenue streams through cross sell opportunities/new products.

Key Skills/Competencies required

- ⇒ A sales oriented "hunter" attitude with experience in the crushing/screening industry highly desirable for this role.
- ⇒ Knowledge of the Metso Crushing & Screening products an advantage.
- ⇒ An in depth understanding of the heavy construction equipment industry.
- ⇒ Highly effective communication skills.
- ⇒ Track record of bringing energy to an organisation; delivering results; an ability to work effectively within a small team and have outstanding people skills.
- ⇒ Demonstrate highly developed influencing and organisational skills to achieve success in the sales role.

Media Release - 16.9.2013

Former quarry site set to become upmarket residential subdivision

The land which once housed one of the oldest and biggest stone and rock quarries in the Waikato has been placed on the market for sale as an upmarket residential subdivision. Twelve sections in the Paeroa subdivision of Rockridge Estate encircle a castle-like mound which is all that remains of the town's old quarry which dates back to the late 1940s.

Soft rock hauled out of the quarry was used in the foundations of many roads and buildings throughout the Waikato and Coromandel regions. The Kerepehi Dairy factory was the first building to be constructed using the Paeroa quarry stone.

The quarry was first developed by Paeroa-based trucking firm Brenan & Company and has passed through numerous sets of owners over the ensuing decades. The last quarrying activity was believed to have taken place in the mid-1990s when then-owner Dolph Rasmussen planned to flatten the core mound of the quarry by removing the last remaining tonnes of rock and stone.

However, by leaving the last bastion of the quarry intact, a unique topographic feature has been retained in the town – along with the only reference to Paeroa's once thriving quarrying industry.

As demand for new-build sections in the town has emerged, the land has been subdivided and is being marketed for sale by Bayleys.

The 2010 Hauraki District Plan consultative report noted that: "Land suitable for residential development in Paeroa is constrained by a number of geographic features, such as the Ohinemuri River."

"Accordingly, the land that is available for residential development needs to be used wisely. In addition, residential land development needs to be undertaken giving effect to good quality urban design principles," said the council report.

A subsequent Hauraki District Plan update published last year, identified Paeroa as one of the region's key service towns – along with Waihi and Ngatea. The report specified that new residential expansion in the township should be of a low density nature "to provide a variety of living choice, and to create a buffer zone between some parts of the urban areas and the adjoining rural zone, and to direct low-density residential living to locations where it can support the major serviced urban towns (such as Paeroa)."

Bayleys sales person Robyn Cruickshank who is marketing the Rockridge Estate, said the exclusive enclave had been designed to comply with the council's vision for creating high quality residential clusters around town fringes.

Properties within the Rockridge Estate range in size from 482 square metres to two hectares, varying in price from \$72,000 to \$350,000 for the largest plot.

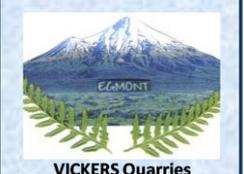

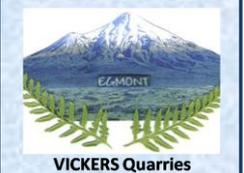

"A subdivision such as Rockridge enables its residents to have the best of both worlds – only minutes drive into Paeroa town centre, yet with semi-rural views overlooking surrounding hills and countryside," she said.

"It also enables owners to have new-build homes. In line with societal trends, we are seeing more and more people wanting two or three bathrooms per dwelling rather than the traditional one, or 'media rooms' with big screen TVs, or a dedicated office and computer space, and most commonly – expansive outdoor decking and BBQ space.

"Older style villas and bungalows close to the town centre simply don't have the design capacity to contain many of these new elements to modern living, so buyers are choosing to buy new." Mrs Cruickshank predicted that interest in the Rockridge subdivision would come from a broad demographic spectrum – ranging from families with young children, through to recent retirees wanting to stay in the Paeroa vicinity.
