

Carry out the risk management processes at an extractive site

Course Overview

This course covers the skills and knowledge required to carry out risk management processes at an extractive site.

At the successful completion of this course learners will be able to:

1. Determine the risk management processes to be carried out
2. Identify hazards
3. Assess risk
4. Identify unacceptable risk and potential actions for risk control
5. Decide on, and implement or facilitate risk control action
6. Review the implementation of risk control actions
7. Complete records and reports for risk management

Unit standard achieved

26856 – Carry out the risk management processes at an extractive site.

This unit standard is a new requirement for a Certificate of Competence (CoC) under the Health and Safety in Employment (Mining Operations and Quarrying Operations) Regulations 2013 for the following CoC holders:

- B Grade Quarry Manager
- A Grade Quarry Manager
- B Grade Opencast Coal Mine Manager
- A Grade Opencast Coal Mine Manager
- First Class Coal Mine Manager
- First Class Mine Manager
- Coal Mine Underviewer
